

Trade Theory: Virtual Analysis and Designs Finite Element Method

Government ITI Trades Portal

Category: Emerging Technologies

Duration: 2 years

Eligibility: 10th class pass

Description

Virtual Analysis and Designs means designing and testing a product on a computer before making it in real life. Students create 3D models, then check if they will break, heat up, or fail using software.

Core Syllabus and Curriculum

Core syllabus and curriculum

- 2D drafting and 3D modeling
- Assembly
- 3D printing
- Reverse engineering

Apprenticeship Opportunities

Apprenticeship Opportunities

- DRDO Defence Research and Development Organisation
- ISRO Indian Space Research Organisation
- Aerospace and defence
- Automobile

Job Opportunities

Private Sector

- CAD engineer
- CAE engineer
- Simulation analyst
- Product companies

Salary Range

Fresher: Rs. 15,000-20,000/month; Experienced/licensed: Rs. 30,000-60,000/month
